

Niagara AI Application

AI-powered Niagara automation via oBIX + REST API

Slide 1: N4 API Ecosystem Comparison

oBIX (free) | Gline REST (free) | BTIB (\$462+) | Tridium REST

Slide 2: oBIX Protocol

Read/Write, History, Alarms, Links, proxyExt config. Cannot create/delete/rename.

Slide 3: Gline REST API

8 ops: ADD REMOVE RENAME DUPLICATE LIST LINK UNLINK MOD. Port configurable.

Slide 4: Commercial Solutions

BTIB: \$462-\$1,001. Tridium REST: needs SMA license.

Slide 5: Full Comparison Matrix

Six solutions compared: price, auth, read/write, create/delete, links, history.

Slide 6: AI Demo - T8600 Modbus Thermostat

AI searches Modbus register map, adds device, creates points, configures proxyExt, generates PX/HTML, uploads via FTP, verifies in browser, auto-fixes errors.

Tools: DeepSeek V4 Flash + OpenClaw + REST API + oBIX + FTP

Slide 7: Technical Operation Flow

REST API: LIST > ADD > MOD > CP > RENAME

oBIX: GET auth > PUT addr > PUT regType > GET verify

Slide 8: PX Binding and Deployment

MOD inputString > INVOKE execute > Browser. Use ObjectToString, single quotes, import converters. No XML decl, no emoji, no BOM.
